Uniwell

DX890-SERIES

Designed specifically for Casual Dining, Bars, Clubs and Quick Service Restaurants

The Uniwell DX-890-Series is a 10.4 256 Color TFTtouch screen terminal with flash ROM technology. TFT provides fast refresh speeds and very high resolution. The viewing angle of the display is easily adjustable, promoting smooth, accurate transaction entry. Training new employees is quick and simple.

A standard High Speed Ethernet interface enables the IRC System to be configured to meet any busy environment that requires heavy data transfer at high speeds.

The DX-890-Series Flash ROM firmware was developed from the already proven TX-850 and has been enhanced with new features like "Table Plan". Also the two models can be used in the same IRC system.

For Quick Service Restaurants, the DX-890-Series provides Eat In, Take Out and Delivery Functionality with totals. Automatic piece count reporting promotes accurate preparation to meet cooking needs at peak periods of the day.

FTP Client or Server configurations provide for powerfull programming and reporting tools. Reports can be sent via FTP to the back office PC automaticaly or initiated by the operator.
